PICOCTF

WEB EXPLOITATION

1. Insp3ct0r

This is one of the easiest challenges on PicoCTF very straight forward

Description

Kishor Balan tipped us off that the following code may need inspection:

https://jupiter.challenges.picoctf.org/problem/44924/

http://jupiter.challenges.picoctf.org:44924

How to tackle the task

- I clicked on the provided link and redirected to a site.

- Right-click on the page and click on inspect or the F12 key.

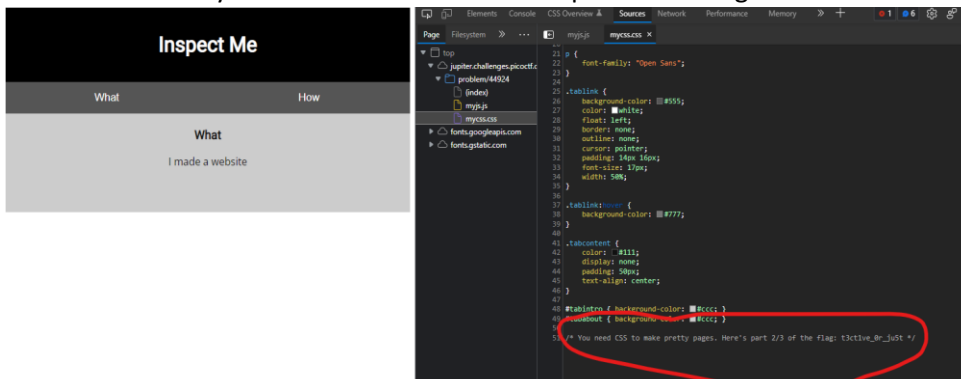

- Click on Sources on the menu bar after I found different files that make up the web page clicked on the index file and saw the text at the bottom. That is part of the flag we need to find the rest of the flag.
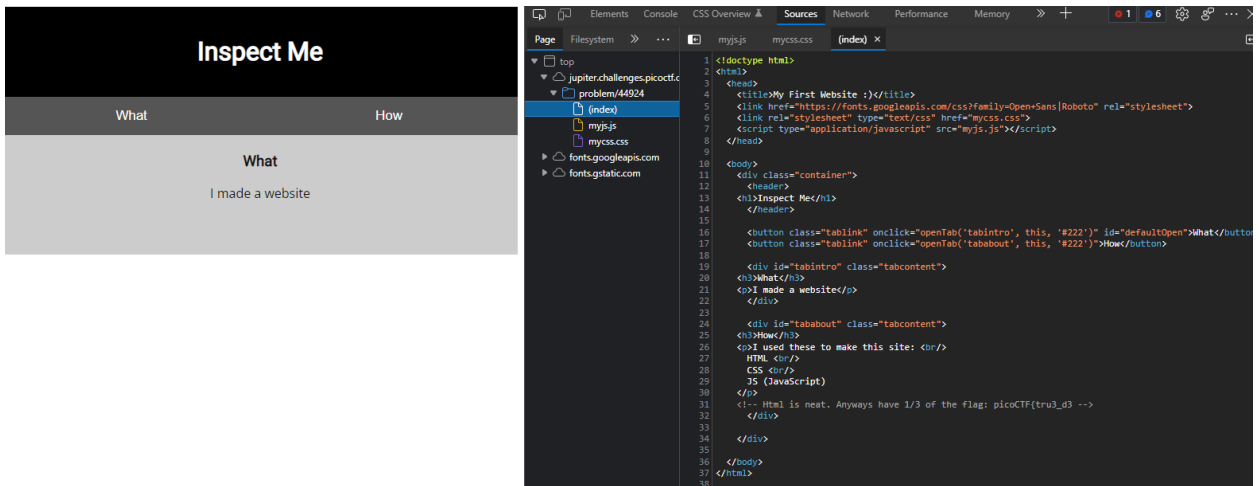

- Went to the next file myjs.js and found the third part

- I clicked on the mycss folder and saw the other part of the flag

- When we combine all the parts we get the full flag.
  'picoCTF{tru3_d3t3ct1ve_0r_ju5t_lucky?f10be399}'

- Submit the flag and get the points 👌
